ABOUT US

*Since **1992***

The Reliable Face of the Sector, Expert Plastic Manufacturer and Quality Leader

Nur Plastik, which stepped into the sector with foundations laid in Istanbul in **1992,** has become one of the most reliable and leading brands in the automotive sector today with its experience of more than **30 years.**

Our main focus since our establishment is **our license plate frame journey, which began with our high-precision plastic injection production.** Over the years, we have expanded this expertise to include a rich range encompassing floor mats, keychains, car air fresheners, and other plastic-based promotional products.

*A Journey of Quality, **Trust and Innovation***

Behind our success lies our constantly customer-focused approach and our uncompromising commitment to quality production. This approach has allowed us to serve many well-known brands, not only in Turkey but also in the global market.

One of the most important steps that solidified our pioneering position in the sector is obtaining **Turkey's first patent in the license plate frame sector in 2004.** We continuously update our fleet of new-generation and environmentally friendly plastic injection machines by closely following technological developments.

Most recently in 2022, by obtaining a patent for the Ultra Model, our rubber-backed license plate frame, we have once again proven our mission to offer innovative solutions in plastic production.

STAR
Model License Plate Holder

Since **1992**

Different Strip Color Options (red, white, black)

Star Model License Plate Frame has been specially designed for those seeking both a stylish look and high security. With its impact-resistant **Moblen body** and high-strength **ABS clamp,** it offers maximum durability.

- *Clip System*
- *1. st Grade German Foil*
- *Original Raw Metarial*
- *Screen, Digital and Embossed Printing*

Thanks to the extra lock mechanism integrated into the lower body, the plate remains securely in place even when the frame is open. **The 6-point locking frame system** and the four spring-supported holders provide secure fastening.

Replaceable Advertising Area!

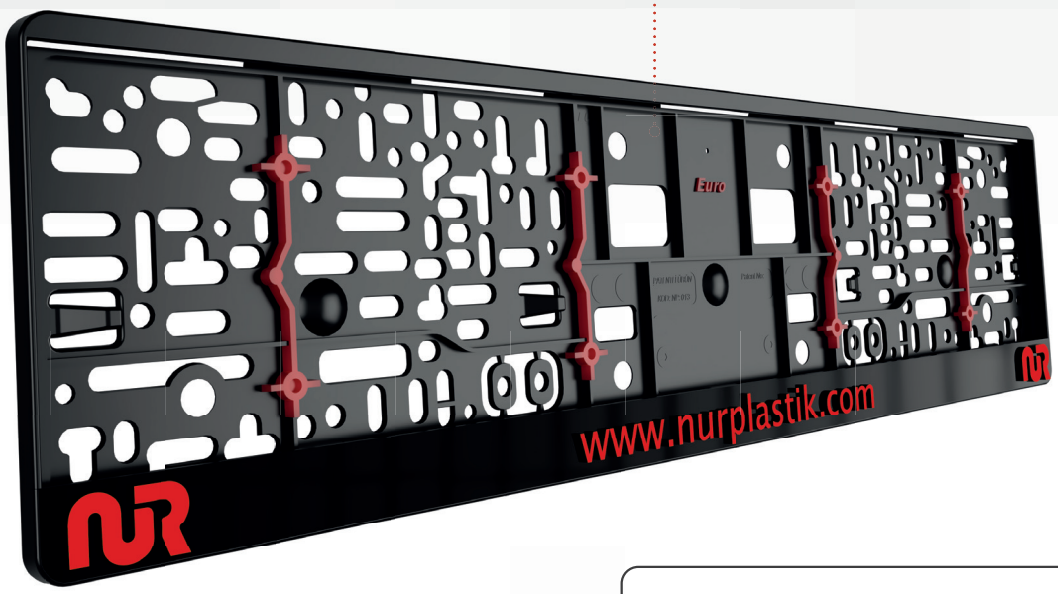

The advertising surface is independent from the plate and can be easily replaced even if the frame wears out over time. This extends the product's lifespan and reduces printing costs.

Professional Appearance for Vehicle Displays

Designed to provide an eye-catching and corporate look when promoting vehicles for sale or rent. It is an ideal solution for both showroom and outdoor exhibitions.

PLATE FRAME

PRINTING OPTIONS

*Since **1992***

License Plate Frame

Design Options

License plate frame designs utilize several printing techniques to enhance brand identity. Embossing provides a premium, three-dimensional effect, and the sandy embossed variant adds a unique, granular texture. For a luxurious finish, silver and gold hot stamping applies metallic foils with heat and pressure, yielding a striking gloss.

Finally, digital printing offers maximum flexibility by allowing complex, high-resolution, full-color graphics to be applied directly onto the frame.

- ***Embossed Printing (Hot Stamping)***
- ***Sanded Background***
- ***Digital Printing***
